EDUCATION

Guru Gobind Singh Indraprastha University

2022 - 2024

Master of Technology in Computer Science and Engineering, Minor in Data Science | CGPA: 9.0

Dr. A.P.J Abdul Kalam Technical University

2017 - 2021

Bachelor of Technology in Computer Science and Engineering | CGPA: 8.71

SKILLS

• Languages: C, Python, HTML, CSS, JavaScript, SQL

• Frameworks/Libraries: React, Angular, Node.js, Express, Bootstrap

Database: MySQL, MongoDBVersion Control: Git, GitHub

EXPERIENCE

Software Engineer Intern, NovoInvent Software Pvt. Ltd.

April 2020 - May 2021

- Developed over 10 components based on design specifications, ensuring adherence to project requirements and guidelines, streamlining development processes and improving project completion efficiency.
- Independently wrote more than 5,000 lines of maintainable code for web applications using Angular, Bootstrap, HTML, and CSS, contributing to the successful launch of 2 major projects within deadlines.
- Fixed 100+ bugs from existing websites and applied enhancements that improved web functionalities and increased page load speed by 20%.
- Created and deployed 50+ automation scripts for functional and regression testing, streamlining the testing process and improving efficiency.

PROJECTS

Portfolio | *HTML*, *CSS*, *JavaScript* ▶

April 2024

- Created a personal portfolio using HTML, CSS, and JavaScript, showcasing projects and skills through an interactive interface.
- Implemented responsive design and smooth animations, enhancing user experience across various devices and screen sizes.

WeatherNow | ReactJS, OpenWeatherMap API

December 2023

- Developed WeatherNow, a web application delivering real-time weather forecasts using the OpenWeatherMap API.
- Integrated geolocation services to provide accurate weather updates with a focus on responsive and efficient performance.

Expense Buddy | *ReactJS*, *MongoDB*

March 2023

- Implemented Expense Buddy, a web application designed for practice to manage and track expenses.
- Included features like expense categorization and budget management, utilizing MongoDB for efficient data handling and storage.

Beat Breakdown | *ReactJS*, *Spotify API*

August 2022

- Built Beat Breakdown, a web application that organizes and analyses users' Spotify listening data.
- Enabled features such as playlist creation and listening pattern insights to enhance the user's music experience.
