EDUCATION

Guru Gobind Singh Indraprastha University   July 2022 - July 2024
Master of Technology in Computer Science and Engineering, Minor in Data Science   CGPA : 8.78

Dr. A.P.J Abdul Kalam Technical University   July 2017 - August 2021
Bachelor of Technology in Computer Science and Engineering   CGPA: 8.71

SKILLS

- **Languages:** C , HTML, CSS, JavaScript, SQL
- **Frameworks/Libraries:** React, Angular, Node.js, Express, Bootstrap
- **Database:** MySQL, MongoDB
- **Version Control:** Git, GitHub

EXPERIENCE

Software Engineer Intern, NovoInvent Software Pvt. Ltd., Noida   April 2020 - May 2021
- Developed over 10 components based on design specifications, ensuring adherence to project requirements and guidelines, streamlining development processes and improving project completion efficiency.
- Engineered over 5,000 lines of scalable code for web applications using Angular, Bootstrap, HTML, and CSS, contributing to the successful launch of 2 major projects within deadlines.
- Fixed 100+ bugs from existing websites and applied enhancements that improved web functionalities and increased page load speed by 20%.
- Created and deployed 50+ automation scripts for functional and regression testing, streamlining the testing process and improving efficiency.

PROJECTS

Personal Portfolio | *HTML, CSS, JavaScript* ↗   April 2024
- Created a personal portfolio using HTML, CSS, and JavaScript, showcasing 10+ projects and skills through an interactive interface.
- Implemented responsive design and smooth animations, enhancing user experience across multiple devices and screen sizes.

Expense Buddy | *MERN Stack (MongoDB, Express.js, React.js, Node.js)*   March 2024
- Implemented Expense Buddy, a web application designed for practice to manage and track expenses.
- Included features like expense categorization across 10 categories (e.g. Food, Transportation, Housing, Entertainment, and so on) and budget management, utilizing MongoDB for efficient data handling and storage.

WeatherNow | *ReactJS, OpenWeatherMap API*   January 2024
- Developed WeatherNow, a web application delivering real-time weather forecasts using the OpenWeatherMap API, and displaying 5-day forecasts with temperature, humidity, and wind speed data.
- Integrated geolocation services to provide accurate weather updates with a focus on responsive and efficient performance.

Beat Breakdown | *ReactJS, Spotify API*   December 2023
- Built Beat Breakdown, a web application that organizes and analyses users' Spotify listening data using Spotify API.
- Enabled features such as playlist creation with 50+ tracks added per playlist and listening pattern insights to enhance the user's music experience.
